Unit1-Chemistry-NewV1.pdf - Student Version (verA)

Subject: chemistry
Course Code: SCH3U
Unit: Unknown Unit

Instructions: Answer all questions. Show full work where required. Write clearly and use appropriate notation.

Main Section

Section Plan: 11 questions

1. Answer a fresh question that demonstrates understanding of the main concept in this section. (3 marks)

2. Describe what evidence you would record to show a chemical reaction occurred even when the solution stays clear. Show the essential steps clearly. (3 marks)

3. Explain the central idea from this section using an appropriate example. Use appropriate notation in your response. (3 marks)

4. Describe one real-world application of combustion reactions and one safety concern associated with it. (3 marks)

5. Explain why a blue Bunsen burner flame is preferred for heating in the lab. Show the essential steps clearly. (3 marks)

6. Why is using correct chemical notation important when recording observations and equations in a chemistry lab? Use appropriate notation in your response. (3 marks)

7. Answer a fresh question that demonstrates understanding of the main concept in this section. (3 marks)

8. Describe one real-world application of combustion reactions and one safety concern associated with it. Show the essential steps clearly. (3 marks)

9. Answer a fresh question that demonstrates understanding of the main concept in this section. Use appropriate notation in your response. (3 marks)

10. Describe what evidence you would record to show a chemical reaction occurred even when the solution stays clear. (3 marks)

11. Explain the central idea from this section using an appropriate example. Show the essential steps clearly. (3 marks)
